CardKeep 0.6.2 Phone Test Plan

Build under test: CardKeep 0.6.2 (version code 12) from GitHub Releases, file `CardKeep-0.6.2-arm64-v8a.apk`. **Covers:** every feature in the app (roadmap S0 to S14), every fix from the 0.6.1/0.6.2 audit, and the audit's manual-review items that can only be checked on a real phone. **Time:** the smoke pass takes about 15 minutes; the full pass takes 2 to 3 hours and can be split by section.

All names, numbers and addresses in this plan are fictional. Use your own real cards where a step says "a real card".

How to use this plan

1. Do **Part 1, Setup**, once.
2. Do **Part 2, Smoke test** (15 minutes). If anything in it fails, stop and report it: the full pass will hit the same problem.
3. Work through **Part 3, Full pass**, section by section, in any order. Each test has numbered steps, the expected result, and a box to tick Pass or Fail with notes.
4. Fill in the **Summary checklist** below as you go, then send the report described in **How to report a failure**.

Words used in this plan

Word	Meaning
Drawer	The side menu: tap the round button with two lines at the top left of Contacts.
+ menu	The round + button at the top right of Contacts.
Force-stop	Android Settings > Apps > CardKeep > **Force stop**. Simulates the app being killed.
Review queue	Drawer > **Review queue**: scanned cards waiting for you to check and save.
Snackbar	The short message bar that appears at the bottom of the screen.

How to report a failure

For every Fail:

1. Take a screenshot (power + volume down) of the screen at the moment it went wrong.
2. Write down the **test ID** (for example `SCAN-04`), the **step number**, and what you saw instead of the expected result.
3. If the app closed by itself, say so, and say what you tapped just before.
4. Send: phone model, Android version (Settings > About phone), the list of failed IDs with notes, and the screenshots named by test ID (`SCAN-04.png`).

Summary checklist

Tick each test as you finish it. Sections can be done in any order.

Area	Tests	Pass	Fail	Not done
Setup	SET-01 to SET-04			
Smoke	SMK-01 to SMK-08			
Contacts list and search	CON-01 to CON-08			
Adding and editing contacts	EDT-01 to EDT-09			
Contact page actions	ACT-01 to ACT-07			
Scanning: one card	SCAN-01 to SCAN-09			
Scanning: batch, pile and gallery	BAT-01 to BAT-06			
Review queue	QUE-01 to QUE-05			
Tags	TAG-01 to TAG-04			
Duplicates and merge	DUP-01 to DUP-04			
Career moves	CAR-01 to CAR-04			
Events	EVT-01 to EVT-05			
Follow-ups and reminders	FUP-01 to FUP-07			
Import	IMP-01 to IMP-06			
Export and backup	EXP-01 to EXP-05			
Restore	RES-01 to RES-07			
My card	MYC-01 to MYC-04			
Tap cards (NFC)	NFC-01 to NFC-07			
Updates	UPD-01 to UPD-04			
Settings and themes	SETG-01 to SETG-08			
Privacy and security	PRV-01 to PRV-07			
Permissions denied	PRM-01 to PRM-04			
Offline (airplane mode)	OFF-01 to OFF-03			
Accessibility and big font	A11Y-01 to A11Y-05			
Reliability (kill and restart)	REL-01 to REL-05			

Part 1: Setup

What to have ready

- Your Android phone, charged above 50%, with at least 500 MB free.
- **5 to 10 real business cards**, including at least one two-sided card, one card with a fax number, one card with a name in ALL CAPS, one dark card with light text, and one card with a QR code if you have one.
- **A plain table** with a contrasting colour (cards scan best on a dark surface).
- **NFC (optional):** a tap card (Popl, Linq, Blinq, or similar), or a blank NFC sticker, or a second phone. A payment card or door badge for the "not read" check.
- **Sample files:** the `.vcf` and `.csv` in **Appendix A**. Copy them to the phone (email them to yourself, or save them to Downloads). A file manager app (Files by Google is fine).
- A computer or second device is **not** needed.

SET-01: Download and install

Checks: the APK installs from GitHub.

1. On the phone, open `https://github.com/AxialForge/cardkeep/releases/latest` in Chrome.
2. Under **Assets**, tap `CardKeep-0.6.2-arm64-v8a.apk`. If Chrome warns that the file may be harmful, tap **Download anyway**.
3. Open the downloaded file. If Android asks, tap **Settings** and turn on **Allow from this source** for Chrome, then go back.
4. Tap **Install** (or **Update** if an older CardKeep is installed).
5. Tap **Open**.

Expected: CardKeep opens on **Contacts**. If you updated from an older version, your contacts are still there.

Result	Notes
☐ Pass ☐ Fail	

SET-02: Version check

1. Drawer > **Settings**, scroll to the bottom.

Expected: Version shows **0.6.2**.

Result	Notes
☐ Pass ☐ Fail	

SET-03: Fresh start (optional but recommended for a full pass)

Checks: first launch on an empty library. Only do this if you have no contacts you want to keep, or after taking a backup (EXP-03).

1. Android Settings > Apps > CardKeep > Storage > **Clear storage**.
2. Open CardKeep.

Expected: Contacts shows "No contacts yet" with **Scan a card** and **Add by hand**. No error.

Result	Notes
☐ Pass ☐ Fail ☐ Skipped	

SET-04: Note your phone

Write down: phone model __, **Android version** _, ***screen size (normal/large) , NFC present (yes/no) , where the NFC reader sits on the back*** ___.

Part 2: Smoke test (15 minutes)

Do these in order. If any fails, report it before continuing.

SMK-01: App opens

1. Open CardKeep from the home screen.

Expected: Contacts appears within about 2 seconds. No error message.

Result	Notes
☐ Pass ☐ Fail	

SMK-02: Scan one real card

1. Tap **Scan card** (bottom right).
2. If asked, allow the camera (**While using the app**).
3. Hold the phone over a real card on the table until the frame locks and it captures (or tap the shutter).

Expected: the card is shown flat and straight, with coloured boxes on the name, title, company, email and phone, then a sheet with the name and company. No crash.

Result	Notes
☐ Pass ☐ Fail	

SMK-03: Save the scanned card

1. On the sheet, tap **Use this card**.
2. Check the form, fix anything wrong, tap **Save**.

Expected: the contact page opens with the card image at the top. Back to Contacts: the person is listed.

Result	Notes
☐ Pass ☐ Fail	

SMK-04: Add by hand

1. + menu > **Add by hand**.
2. First name `Avery`, last name `Lindqvist`, company `Northwind Forging`, phone `330 555 0187`, email `avery@northwind.example`.
3. Tap **Save**.

Expected: the contact page opens. Back on Contacts: "Avery Lindqvist" appears.

Result	Notes
☐ Pass ☐ Fail	

SMK-05: Search

1. On Contacts, tap the search box, type `north`.

Expected: Avery Lindqvist is shown; people who don't match are hidden.

Result	Notes
☐ Pass ☐ Fail	

SMK-06: Call and email buttons

1. Open Avery. Tap the phone number.
2. Go back to CardKeep. Tap the email.

Expected: the dialler opens with 330 555 0187 (it does not call by itself). The email app opens addressed to avery@northwind.example.

Result	Notes
☐ Pass ☐ Fail	

SMK-07: Back button

1. Drawer > **Tags**. Drawer > **Events**. Drawer > **Settings**.
2. Press Back once.
3. Press Back again.

Expected: the first Back returns to **Contacts** (not to Events or Tags). The second Back leaves the app.

Result	Notes
☐ Pass ☐ Fail	

SMK-08: Backup

1. Drawer > **Export and backup** > **Back up now** (or **Create backup**). Save the file to Downloads.

Expected: a `.zip` is saved and a message says so.

Result	Notes
☐ Pass ☐ Fail	

Part 3: Full pass

Contacts list and search

CON-01: List and counts

1. Make sure you have at least 5 contacts (scan or add some).
2. Look at the top of Contacts.

Expected: "N people across M companies" matches what you have. Each row shows name, title and company.

Result	Notes
☐ Pass ☐ Fail	

CON-02: Name / Company / Recent views

1. Tap **Company**.
2. Tap **Recent**.
3. Tap **Name**.

Expected: Company groups people under their company. Recent shows the newest first. Name is alphabetical with letter headers.

Result	Notes
☐ Pass ☐ Fail	

CON-03: Sort by first or last name

1. On Name view, tap **By last name** (the sort toggle) to switch to first name.
2. Switch back.

Expected: the order and letter headers change between first and last name. The choice is kept after closing and reopening the app.

Result	Notes
☐ Pass ☐ Fail	

CON-04: Search fields

1. Search for part of a phone number (e.g. `0187`).
2. Search for a word that appears only in someone's notes.
3. Search for a company name.

Expected: each search finds the right person.

Result	Notes
☐ Pass ☐ Fail	

CON-05: Filter chips

1. Tap **Hot**, then **Warm**, **Cold**, **Follow-up due**, **Moved** in turn (scroll the chips sideways for more).
2. Tap the active chip again to clear it.

Expected: each chip narrows the list to matching people (it may be empty). Clearing shows everyone again. (Hot/Warm/Cold only appear when **Lead ratings** is on in Settings.)

Result	Notes
☐ Pass ☐ Fail	

CON-06: Select several

1. Long-press a contact. Tap two more.
2. Tap **Add tags to 3**, pick or create a tag `Trade show`.

Expected: the three people get the tag; the selection bar disappears.

Result	Notes
☐ Pass ☐ Fail	

CON-07: Scrolling a long list

1. With 30+ contacts (import Appendix A's CSV twice if you need more), fling the list up and down quickly.

Expected: smooth scrolling, no blank rows, no stutter longer than a moment.

Result	Notes
☐ Pass ☐ Fail	

CON-08: Empty search

1. Search for `zzzzqq`.

Expected: a friendly "no matches" message, not an empty white screen or an error.

Result	Notes
☐ Pass ☐ Fail	

Adding and editing contacts

EDT-01: Full form

1. + menu > **Add by hand**.
2. Fill: first `Mara`, tap **Add middle name or initial** and type `J`, last `Okonkwo`, title `Quality Manager`, company `Halden Tooling`.
3. **Add phone** twice: `440 555 0102` labelled Office with extension `214`, and `216 555 0177` labelled Mobile.
4. Add a fax `440 555 0103`.
5. **Add email**: `mara.okonkwo@halden.example`.
6. Website `halden.example`. Address `1200 Industrial Pkwy, Streetsboro, OH 44241`.
7. Note: `Met at the spring expo, wants a quote on closed-die parts.`
8. Save.

Expected: the page shows all values; the office phone shows "ext. 214"; the fax is listed separately; the name reads "Mara J. Okonkwo".

Result	Notes
☐ Pass ☐ Fail	

EDT-02: Edit and save

1. On Mara's page tap **Edit**, change the title to `Senior Quality Manager`, Save.

Expected: the new title shows on the page and in the list.

Result	Notes
☐ Pass ☐ Fail	

EDT-03: Required fields

1. **Add by hand**, leave everything empty, tap Save.

Expected: "Add at least a name, company, phone or email." Nothing is saved.

Result	Notes
☐ Pass ☐ Fail	

EDT-04: Discard changes

1. Edit Mara, change the company, press Back without saving.

Expected: you are asked whether to discard; choosing discard leaves the old company.

Result	Notes
☐ Pass ☐ Fail	

EDT-05: Extra lines

1. Edit Mara, tap **Add a line**, label `Plant`, value `Plant 2`. Save.

Expected: the extra line shows on the page.

Result	Notes
☐ Pass ☐ Fail	

EDT-06: Lead rating (if Lead ratings is on)

1. On Mara's page set the rating to **Hot**.

Expected: a Hot badge shows; the **Hot** chip on Contacts lists her.

Result	Notes
☐ Pass ☐ Fail	

EDT-07: Delete and undo

1. On Mara's page, open the 3-dot menu > **Delete**, confirm.
2. Tap **Undo** in the snackbar.

Expected: she disappears, then comes back with all her details after Undo.

Result	Notes
☐ Pass ☐ Fail	

EDT-08: Delete for good (7-day purge)

Checks: the 0.6.1 fix that deleted contacts are wiped after 7 days. You cannot speed up the clock, so this is a two-part check.

1. Add a throwaway contact `Test Purge`, then delete it (no Undo).
2. Take a backup (EXP-03) and, on a computer, open the zip: `Test Purge` must not be in it (search the `card_organizer.sqlite` file for "Purge", or just note it for the next restore test).
3. Seven or more days later, open the app once.

Expected: step 2: the backup does not contain the deleted contact. After 7 days nothing about it remains (this is also covered by automatic tests; note the date you deleted it: _____).

Result	Notes
☐ Pass ☐ Fail ☐ Partial	

EDT-09: ALL-CAPS name

1. Add by hand with first name `DANA`, last name `REYES`. Save.

Expected: shown as "Dana Reyes" (or you are offered that fix).

Result	Notes
☐ Pass ☐ Fail	

Contact page actions

ACT-01: Phone, SMS, email, web, map

1. On Mara: tap the mobile number, then the message icon, then the email, the website and the address.

Expected: dialler (not calling), messages, email app, browser at halden.example, and maps at the address. Each opens in your default app.

Result	Notes
☐ Pass ☐ Fail	

ACT-02: Copy marked sensitive

1. Long-press (or use the copy icon on) Mara's mobile number to copy it.
2. Pull down the notification shade / keyboard clipboard preview.

Expected: "Copied". On Android 13+, the clipboard preview hides the copied value (shows dots or "Sensitive content") instead of the number.

Result	Notes
☐ Pass ☐ Fail	

ACT-03: Card images

1. Open a scanned contact, tap the card image. Swipe to the back side if it has one.

Expected: a full-screen sharp image; zoom with two fingers works.

Result	Notes
☐ Pass ☐ Fail	

ACT-04: Logo / profile circle

1. Open a scanned contact whose card has a logo.

Expected: the round picture at the top shows the logo (or initials if none was found).

Result	Notes
☐ Pass ☐ Fail	

ACT-05: Share as vCard

1. On Mara's page, 3-dot > **Share as vCard**. Send to yourself by email or save to Files.

Expected: a `.vcf` named after Mara. Opening it in Google Contacts shows her details.

Result	Notes
☐ Pass ☐ Fail	

ACT-06: Save to phone contacts

1. 3-dot > **Share as vCard**, then pick your phone's Contacts app.

Expected: the phone's Contacts app opens with Mara filled in. Nothing is saved until you tap Save there.

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

ACT-07: Bad website value

Checks: 0.6.2 fix: a broken web address no longer crashes the app.

1. Edit a contact, set the website to `javascript:alert(1)`. Save.
2. Tap the website on the page.

Expected: nothing opens or you see a short "can't open" message. The app does not close.

Result	Notes
☐ Pass ☐ Fail	

Scanning: one card

SCAN-01: Auto-capture

1. **Scan card** > mode **One card**. Hold steady over a real card on a dark table.

Expected: the corners lock on the card and it captures by itself within a few seconds; a short animation highlights the fields as they are found.

Result	Notes
☐ Pass ☐ Fail	

SCAN-02: Field accuracy

1. Scan 5 different real cards. For each, compare the sheet with the card.

Expected: name, title, company, phone(s) and email are right on most cards. Note any field that was wrong, and on which card: _____

Result	Notes
☐ Pass ☐ Fail	

SCAN-03: Two-sided card

1. Scan the front, tap **Add the back side**, scan the back.

Expected: details from both sides are combined; the contact page shows both images.

Result	Notes
☐ Pass ☐ Fail	

SCAN-04: Adjust corners

1. Scan a card at an angle, tap **Adjust corners**, drag a corner, confirm.

Expected: the image is re-cut along your corners and re-read.

Result	Notes
☐ Pass ☐ Fail	

SCAN-05: Retake

1. After a capture, tap **Retake**.

Expected: back to the camera; nothing saved.

Result	Notes
☐ Pass ☐ Fail	

SCAN-06: Fax, extension, middle initial, ALL CAPS

1. Scan your card with a fax, one with an extension, one with a middle initial, and one in capitals.

Expected: fax goes to Fax (not Phone); extension is kept; middle initial lands in the middle name; capitals become normal case.

Result	Notes
☐ Pass ☐ Fail	

SCAN-07: Dark card

1. Scan a dark card with light text.

Expected: it is read (fields found), not a blank result.

Result	Notes
☐ Pass ☐ Fail	

SCAN-08: QR code on a card

1. Scan a card that has a QR code with a vCard or URL.

Expected: QR details are used (vCard fields, or the link as website).

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

SCAN-09: Flash and low light

1. In a dim room, tap the flash icon to turn it on, scan a card.

Expected: the torch comes on; the card is read.

Result	Notes
☐ Pass ☐ Fail	

Scanning: batch, pile and gallery

BAT-01: Batch mode

1. **Scan card** > **Batch**. Scan 5 cards one after another without stopping.
2. Leave the screen.

Expected: a counter goes up; the cards are read in the background and appear in the Review queue.

Result	Notes
☐ Pass ☐ Fail	

BAT-02: Pile mode

1. + menu > **Scan a stack** (or Scan > **Pile**). Lay 3 cards side by side, capture once.

Expected: 3 separate cards appear in the Review queue.

Result	Notes
☐ Pass ☐ Fail	

BAT-03: Gallery import

1. Photograph 2 cards with the normal camera app first.
2. Scan screen > gallery icon (bottom left), pick one photo, tap **Done**.

Expected: the card is read just like a live scan.

Result	Notes
☐ Pass ☐ Fail	

BAT-04: Import card photos (several)

1. + menu > **Import card photos**, pick both photos.

Expected: both go to the Review queue.

Result	Notes
☐ Pass ☐ Fail	

BAT-05: Auto-save clear cards

1. Settings > turn **Save clear cards automatically** on. Batch-scan 3 clear cards.
2. Turn it off afterwards.

Expected: clearly read cards are saved straight to Contacts; unclear ones still go to the queue.

Result	Notes
☐ Pass ☐ Fail	

BAT-06: Scan mode buttons size

1. On the scan screen, tap **One card**, **Batch**, **Pile** with your thumb, each a few times.

Expected: each tap selects the mode first time; no near-misses (0.6.2 made them 48 dp tall).

Result	Notes
☐ Pass ☐ Fail	

Review queue

QUE-01: Open and review

1. Drawer > **Review queue**. Tap a card.

Expected: the card image with highlighted fields and an editable form.

Result	Notes
☐ Pass ☐ Fail	

QUE-02: Save from queue

1. Fix a field, tap **Save**.

Expected: the card leaves the queue and the contact appears in Contacts.

Result	Notes
☐ Pass ☐ Fail	

QUE-03: Discard and undo

1. Discard a card, tap **Undo**.

Expected: it comes back with its image.

Result	Notes
☐ Pass ☐ Fail	

QUE-04: Link to existing contact

1. Scan the card of someone you already have, open it in the queue, choose to add it to the existing person.

Expected: the card is attached to that person; no duplicate is created.

Result	Notes
☐ Pass ☐ Fail	

QUE-05: Queue count

1. Look at the drawer entry.

Expected: shows the number waiting; it drops as you save or discard.

Result	Notes
☐ Pass ☐ Fail	

Tags

TAG-01: Create and assign

1. Drawer > **Tags** > **Add a tag** `Supplier`. Open a contact, add `Supplier`.

Expected: the tag shows on the contact and in Tags with count 1.

Result	Notes
☐ Pass ☐ Fail	

TAG-02: Filter by tag

1. In Tags, tap `Supplier`.

Expected: Contacts filtered to that tag.

Result	Notes
☐ Pass ☐ Fail	

TAG-03: Rename and colour

1. Rename `Supplier` to `Vendor`, change its colour.

Expected: every tagged contact shows the new name/colour.

Result	Notes
☐ Pass ☐ Fail	

TAG-04: Delete tag

1. Delete `Vendor`.

Expected: removed from all contacts; the contacts themselves stay.

Result	Notes
☐ Pass ☐ Fail	

Duplicates and merge

DUP-01: Detect

1. Add by hand `Avery Lindqvist`, phone `330 555 0187` (same as SMK-04).

Expected: you are warned of a possible duplicate, or it appears under Drawer > **Duplicates**.

Result	Notes
☐ Pass ☐ Fail	

DUP-02: Merge

1. Drawer > **Duplicates**, open the pair, choose which value to keep for each field, **Merge**.

Expected: one Avery with all phones/emails/tags/cards from both.

Result	Notes
☐ Pass ☐ Fail	

DUP-03: Not a duplicate

1. Create two different people with the same company phone. In Duplicates choose **Not the same person**.

Expected: the pair stops being suggested.

Result	Notes
☐ Pass ☐ Fail	

DUP-04: Merge from scan

1. Scan a card of an existing contact and save.

Expected: a possible-duplicate notice on their page.

Result	Notes
☐ Pass ☐ Fail	

Career moves

Needs **Career tracking** on in Settings.

CAR-01: Job change detected

1. Add `Sam Okafor`, company `Brightline`, mobile `216 555 0123`.
2. Add `Sam Okafor`, company `Orbit Medical`, same mobile.

Expected: CardKeep offers "Sam moved to Orbit Medical?" (a job change, not a duplicate).

Result	Notes
☐ Pass ☐ Fail	

CAR-02: Accept the move

1. Accept.

Expected: Sam's page shows Orbit Medical now and Brightline in his history; Drawer > **Career moves** lists it; the **Moved** chip finds him.

Result	Notes
☐ Pass ☐ Fail	

CAR-03: Successor

1. On Brightline (Company view) or the move, add who replaced Sam (pick an existing contact).

Expected: the successor is linked and shown.

Result	Notes
☐ Pass ☐ Fail	

CAR-04: Turn career tracking off

1. Settings > **Career tracking** off.

Expected: Career moves leaves the drawer and job-change prompts stop. Turn it back on.

Result	Notes
☐ Pass ☐ Fail	

Events

EVT-01: Create

1. Drawer > **Events** > new: name `Fabtech 2026`, dates today to tomorrow, place `Chicago`. Save.

Expected: listed under Events.

Result	Notes
☐ Pass ☐ Fail	

EVT-02: Scan session

1. Open the event, **Start scanning**. Scan 2 cards and save them.

Expected: both contacts show **Met at Fabtech 2026**; the event lists them.

Result	Notes
☐ Pass ☐ Fail	

EVT-03: Auto-start

1. Edit the event, turn on auto-start. Close CardKeep fully, reopen.

Expected: "Scanning for Fabtech 2026: new cards go to this event".

Result	Notes
☐ Pass ☐ Fail	

EVT-04: Add someone manually

1. On the event, add an existing contact.

Expected: they now show Met at this event.

Result	Notes
☐ Pass ☐ Fail	

EVT-05: Delete event

1. Delete the event.

Expected: the event is gone; the contacts stay (just without "Met at").

Result	Notes
☐ Pass ☐ Fail	

Follow-ups and reminders

FUP-01: Set a follow-up

1. On a contact, **Follow up** > in 2 minutes (or pick today with a time 2 minutes away). Allow notifications if asked.

Expected: follow-up date shows on the page and in Drawer > **Follow-ups**.

Result	Notes
☐ Pass ☐ Fail	

FUP-02: Notification fires

1. Lock the phone and wait.

Expected: a notification arrives (it may be a few minutes late: CardKeep uses battery-friendly timing).

Result	Notes
☐ Pass ☐ Fail	

FUP-03: Lock screen hides details

Checks: 0.6.2 audit fix MOB-SEC-0002 (manual review item).

1. With the phone locked and the notification showing, look at the lock screen without unlocking.

Expected: the lock screen does **not** show the contact's name, company or event (it shows only "CardKeep" or "Contents hidden"). After unlocking, the full text is visible.

Result	Notes
☐ Pass ☐ Fail	

FUP-04: Tap the notification

1. Tap it (also try once with the app fully closed).

Expected: the contact's page opens.

Result	Notes
☐ Pass ☐ Fail	

FUP-05: Mark done

1. In Follow-ups, mark it done.

Expected: moves out of the due list; the **Follow-up due** chip no longer lists them.

Result	Notes
☐ Pass ☐ Fail	

FUP-06: After reboot

1. Set a follow-up 10 minutes ahead. Restart the phone. Do not open CardKeep.

Expected: the reminder still arrives.

Result	Notes
☐ Pass ☐ Fail	

FUP-07: Two reminders, one done

Checks: 0.6.2 fix: finishing one reminder no longer clears others already shown.

1. Set follow-ups for two contacts 2 minutes ahead. When both notifications show, open CardKeep and mark one done.

Expected: the other notification stays in the shade.

Result	Notes
☐ Pass ☐ Fail	

Import

IMP-01: vCard import

1. Drawer > **Import** > vCard, pick `cardkeep-sample.vcf` (Appendix A).

Expected: a summary (added / merged / skipped / job changes); the people appear with the **Imported** tag.

Result	Notes
☐ Pass ☐ Fail	

IMP-02: Open a .vcf from another app

1. In Files, tap `cardkeep-sample.vcf`, choose **CardKeep**.

Expected: CardKeep opens straight on Import with the file loaded (not "Page Not Found").

Result	Notes
☐ Pass ☐ Fail	

IMP-03: Share a .vcf to CardKeep

1. In Files or Gmail, long-press the `.vcf` > **Share** > CardKeep.

Expected: Import opens with the file.

Result	Notes
☐ Pass ☐ Fail	

IMP-04: CSV import with column mapping

1. Import > CSV, pick `cardkeep-sample.csv`.
2. Check the column mapping screen (First, Last, Company, Phone, Email).
3. Import.

Expected: columns are matched automatically; 5 people are added.

Result	Notes
☐ Pass ☐ Fail	

IMP-05: Semicolon CSV

1. Make a copy of the CSV with `;` instead of `,` (Appendix A has one). Import it.

Expected: detected and imported the same way.

Result	Notes
☐ Pass ☐ Fail	

IMP-06: Large CSV speed

Checks: 0.6.2 fix MOB-SEC-0100.

1. If you have a big contacts export (1000+ rows, e.g. from Google Contacts or LinkedIn), import it.

Expected: the mapping screen appears within a few seconds; no freeze.

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

Export and backup

EXP-01: Export vCard

1. Drawer > **Export and backup** > Export > All > vCard. Save.

Expected: one `.vcf` with everyone; opens in Google Contacts.

Result	Notes
☐ Pass ☐ Fail	

EXP-02: Export CSV / scope

1. Export a tag only (e.g. Trade show) as CSV.

Expected: only those people; opens in Sheets with correct columns.

Result	Notes
☐ Pass ☐ Fail	

EXP-03: Back up now

1. **Back up now**, save to Downloads. Note the size: _____

Expected: a zip named "CardKeep backup "; message confirms.

Result	Notes
☐ Pass ☐ Fail	

EXP-04: Weekly automatic backup

1. Turn on **Weekly backup on this phone**.

Expected: a backup is listed after the next app start; up to 4 are kept.

Result	Notes
☐ Pass ☐ Fail	

EXP-05: Export with images

1. Export with card images included.

Expected: a zip with the vCard/CSV plus the card photos.

Result	Notes
☐ Pass ☐ Fail	

Restore

Take a backup (EXP-03) first. Write down how many contacts you have: _____

RES-01: Normal restore

1. Add a contact `After Backup`.
2. Export and backup > **Restore**, pick the backup from EXP-03, confirm.
3. Close and reopen CardKeep when asked.

Expected: "Backup restored. Your previous data is kept as a fallback copy." `After Backup` is gone; the count matches what you wrote down.

Result	Notes
☐ Pass ☐ Fail	

RES-02: Fallback copy shown

Checks: 0.6.2 fix MOB-REL-0003 / MOB-PRV-0003.

1. Export and backup: look for **Data from before the last restore**.

Expected: shows the date and size of the pre-restore copy, with **Go back to it** and **Discard**.

Result	Notes
☐ Pass ☐ Fail	

RES-03: Go back

1. Tap **Go back to it**, confirm, reopen the app.

Expected: `After Backup` is back (you are back where you were before RES-01).

Result	Notes
☐ Pass ☐ Fail	

RES-04: Discard

1. Restore again, then tap **Discard** on the fallback copy.

Expected: the fallback entry disappears; storage used drops.

Result	Notes
☐ Pass ☐ Fail	

RES-05: Interrupted restore

Checks: 0.6.1 fix MOB-REL-0001 (crash-safe restore).

1. Start a restore; the moment the app says it will finish on the next start, **force-stop** CardKeep (Android Settings > Apps > CardKeep > Force stop).
2. Open CardKeep.

Expected: the restore completes on this start (message shown) or says it will continue; no empty library, no lost data.

Result	Notes
☐ Pass ☐ Fail	

RES-06: Wrong file

1. Restore, pick a random `.zip` or a photo.

Expected: "This is not a CardKeep backup" (or similar). Your data is unchanged.

Result	Notes
☐ Pass ☐ Fail	

RES-07: Damaged backup

1. On a computer, open a backup zip, delete one card photo, re-zip; or truncate the file. Restore it.

Expected: "The backup is damaged" and nothing is replaced.

Result	Notes
☐ Pass ☐ Fail ☐ Skipped	

My card

MYC-01: Create

1. Drawer > **My card**, fill your own details, save.

Expected: a card preview and a QR code.

Result	Notes
☐ Pass ☐ Fail	

MYC-02: QR scan by another phone

1. Show the QR; scan it with another phone's camera.

Expected: the other phone offers to add your contact with the right details.

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

MYC-03: Brightness

1. Open the QR screen.

Expected: the screen brightens to full, and returns to normal when you leave.

Result	Notes
☐ Pass ☐ Fail	

MYC-04: Share my card

1. Share as vCard.

Expected: a `.vcf` of your details.

Result	Notes
☐ Pass ☐ Fail	

Tap cards (NFC)

Skip this section if the phone has no NFC.

NFC-01: Open

1. + menu > **Tap an NFC card**.

Expected: "Hold a card to the back of the phone".

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

NFC-02: NFC off

1. Turn NFC off in Android settings, open Tap cards.
2. Tap **Open NFC settings**, turn NFC on, come back.

Expected: "NFC is off" with the button; after turning it on it starts listening by itself.

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

NFC-03: Contact card

1. Tap a contact tap card on the back.

Expected: a buzz and a row with the name; **Review and save** opens the filled form.

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

NFC-04: Same card twice

1. Tap the same card again at once; then wait 5 seconds and tap again.

Expected: no second row at once; after the wait it reads again.

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

NFC-05: Link card

1. Tap a link card. Try **Open**, then **Save link only**.

Expected: Open shows the page in the browser; Save link only adds a contact with the website and the "NFC link" tag.

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

NFC-06: Payment card / badge

1. Tap a bank card or door badge.

Expected: "Not read"; nothing from it shown or kept.

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

NFC-07: With an event running

1. Start an event scan session, tap a contact card, save.

Expected: Met at that event.

Result	Notes
☐ Pass ☐ Fail ☐ N/A	

Updates

UPD-01: Check for updates

1. Settings > **Check for updates**.

Expected: "You have the latest version" (0.6.2), or offers a newer one.

Result	Notes
☐ Pass ☐ Fail	

UPD-02: Offline check

Checks: 0.6.2 fix MOB-REL-0004.

1. Airplane mode on. Settings > **Check for updates**.

Expected: a short "can't reach GitHub / offline" message. No spinner stuck forever.

Result	Notes
☐ Pass ☐ Fail	

UPD-03: Download cut off (do this when 0.6.3 or later exists)

1. When an update is offered, start the download, and turn on airplane mode halfway.

Expected: "Download failed" message; the sheet resets so you can try again. Retry on Wi-Fi works.

Result	Notes
☐ Pass ☐ Fail ☐ Later	

UPD-04: Check when CardKeep opens

1. Turn on **Check when CardKeep opens**, reopen the app (online).

Expected: a snackbar only if a newer version exists; otherwise nothing.

Result	Notes
☐ Pass ☐ Fail	

Settings and themes

SETG-01: Themes

1. Settings > theme: try **Light**, **Dark**, **Navy and brass**, **Navy and brass dark**, **Match phone**.

Expected: each changes the whole app at once; text stays readable in each.

Result	Notes
☐ Pass ☐ Fail	

SETG-02: Match phone

1. Choose **Match phone**, switch Android dark mode on and off.

Expected: CardKeep follows.

Result	Notes
☐ Pass ☐ Fail	

SETG-03: Phone region

1. Set **Phone region** to United Kingdom, add a contact with phone `020 7946 0018`.

Expected: formatted as a UK number. Set it back to United States.

Result	Notes
☐ Pass ☐ Fail	

SETG-04: Sort names by

1. Change **Sort names by** to First name.

Expected: Contacts re-sorts.

Result	Notes
☐ Pass ☐ Fail	

SETG-05: Lead ratings off

1. Turn **Lead ratings** off.

Expected: Hot/Warm/Cold chips and rating controls disappear. Turn back on.

Result	Notes
☐ Pass ☐ Fail	

SETG-06: Search engine for web checks

1. Pick another engine; on a contact use the web-check action.

Expected: opens in your browser with that engine.

Result	Notes
☐ Pass ☐ Fail	

SETG-07: Licences and privacy text

1. Tap **Open-source licences**, then **Privacy**.

Expected: both open; the update setting says it is the only time CardKeep goes online (it contacts GitHub and sends nothing about you).

Result	Notes
☐ Pass ☐ Fail	

SETG-08: Settings kept

1. Force-stop, reopen.

Expected: all choices kept.

Result	Notes
☐ Pass ☐ Fail	

Privacy and security

PRV-01: Hide in recent apps

Checks: 0.6.2 addition MOB-SEC-0004 (manual review item).

1. Settings > Privacy > **Hide in recent apps** on.
2. Open a contact, then open the app switcher (Recents).
3. Try a screenshot inside CardKeep.
4. Turn it off and repeat.

Expected: with it on, the CardKeep thumbnail is blank and screenshots are blocked. With it off, both work.

Result	Notes
☐ Pass ☐ Fail	

PRV-02: Not in Google backup

Checks: 0.6.2 fix MOB-SEC-0001.

1. Android Settings > Google > Backup > App data: look for CardKeep.

Expected: CardKeep is not listed (or shows no data). Your own CardKeep backups are the only copy.

Result	Notes
☐ Pass ☐ Fail	

PRV-03: Permissions list

Checks: 0.6.2 fix MOB-STORE-0002 / MOB-PRV-0004.

1. Android Settings > Apps > CardKeep > Permissions > see all.

Expected: only Camera, Notifications, Nearby devices/NFC; **no** Microphone, Photos and videos, Music, or Files.

Result	Notes
☐ Pass ☐ Fail	

PRV-04: Data usage

1. Android Settings > Apps > CardKeep > Mobile data and Wi-Fi.

Expected: only a small amount (update checks). Nothing large after scanning many cards.

Result	Notes
☐ Pass ☐ Fail	

PRV-05: Wrong file in vCard intent

1. Open a non-vCard file (a photo) and choose **Open with** CardKeep if offered.

Expected: CardKeep is not offered, or shows "not a contact file". No crash.

Result	Notes
☐ Pass ☐ Fail	

PRV-06: Uninstall

1. At the very end of testing, take a backup, uninstall CardKeep.

Expected: Android removes the app and its data; the backup zip in Downloads is kept.

Result	Notes
☐ Pass ☐ Fail	

PRV-07: Reinstall and restore

1. Reinstall the APK, Restore the zip.

Expected: everything back, card photos included.

Result	Notes
☐ Pass ☐ Fail	

Permissions denied

PRM-01: Camera denied

1. Android Settings > Apps > CardKeep > Permissions > Camera > **Don't allow**. Tap **Scan card**.

Expected: a clear message with a way to open settings; gallery import still works. No black screen.

Result	Notes
☐ Pass ☐ Fail	

PRM-02: Camera "ask every time"

1. Set Camera to **Ask every time**, scan; choose **Only this time**.

Expected: scanning works; next time it asks again.

Result	Notes
☐ Pass ☐ Fail	

PRM-03: Notifications denied

1. Turn off notifications for CardKeep, set a follow-up.

Expected: the app says reminders are off (or asks); the follow-up still shows in Follow-ups.

Result	Notes
☐ Pass ☐ Fail	

PRM-04: Install unknown apps off

1. Turn off **Install unknown apps** for CardKeep, try an update install (when one exists).

Expected: Android asks to allow it; nothing breaks.

Result	Notes
☐ Pass ☐ Fail ☐ Later	

Offline (airplane mode)

OFF-01: Everything works offline

1. Airplane mode on. Scan a card, save, search, add a tag, export, back up.

Expected: all work exactly as online (text reading happens on the phone).

Result	Notes
☐ Pass ☐ Fail	

OFF-02: Links offline

1. Tap a contact's website.

Expected: the browser opens and shows its own offline page; CardKeep is fine.

Result	Notes
☐ Pass ☐ Fail	

OFF-03: Update check offline at start

1. With **Check when CardKeep opens** on and airplane mode on, reopen the app.

Expected: no error message at start.

Result	Notes
☐ Pass ☐ Fail	

Accessibility and big font

A11Y-01: Header buttons

Checks: 0.6.2 fix MOB-A11Y-0001 (48 dp).

1. Tap the drawer button and the + button at the top 10 times each with your thumb.

Expected: every tap hits.

Result	Notes
☐ Pass ☐ Fail	

A11Y-02: Largest font

1. Android Settings > Display > Font size to the largest; Display size largest.
2. Go through Contacts, a contact page, Scan, Settings.

Expected: text is not cut off or overlapping; everything still reachable by scrolling.

Result	Notes
☐ Pass ☐ Fail	

A11Y-03: TalkBack (optional)

1. Turn on TalkBack, swipe through Contacts and a contact page.

Expected: buttons are read with names ("Add", "Menu", "Call", ...), not "button".

Result	Notes
☐ Pass ☐ Fail ☐ Skipped	

A11Y-04: Landscape

1. Turn the phone sideways on Contacts and a contact page (auto-rotate on).

Expected: layout still usable (or the app stays portrait); no crash.

Result	Notes
☐ Pass ☐ Fail	

A11Y-05: One-handed

1. Use the app one-handed for 5 minutes.

Expected: main actions are within thumb reach. Note anything awkward: _____

Result	Notes
☐ Pass ☐ Fail	

Reliability (kill and restart)

REL-01: Kill during batch scan

Checks: 0.6.1 fix MOB-REL-0002.

1. Batch-scan 4 cards quickly. Before the counter finishes, force-stop CardKeep.
2. Open CardKeep.

Expected: "Reading N cards left from last time"; all 4 end up in the Review queue. None lost.

Result	Notes
☐ Pass ☐ Fail	

REL-02: Swipe away during scan

1. Batch-scan 2 cards, then swipe CardKeep away from Recents. Reopen.

Expected: same as REL-01.

Result	Notes
☐ Pass ☐ Fail	

REL-03: Unreadable capture

Checks: 0.6.2 fix MOB-REL-0005.

1. In batch mode, capture a blank sheet of paper or the table.

Expected: it is set aside quietly (or you see "A capture could not be read after 3 tries and was set aside"); it does not reappear at every start.

Result	Notes
☐ Pass ☐ Fail	

REL-04: Low battery / battery saver

1. Turn on Battery saver; scan and save a card.

Expected: works (may be slower).

Result	Notes
☐ Pass ☐ Fail	

REL-05: Phone call during scan

1. During a scan, have someone call you (or switch to another app and back).

Expected: the camera resumes when you return.

Result	Notes
☐ Pass ☐ Fail	

Report sheet

Phone model __ **Android version** _ ***Date*** ___

Failed test ID	Step	What happened	Screenshot file

Totals: Pass _ ***Fail*** _ Skipped/N/A ____

Cards that did not read well (company, colours, anything unusual): _____

Appendix A: Sample files

Copy each block into a text file on the phone (or email it to yourself) with the file name shown.
